

New WifiGuest network for visitors and guests

IT Services has launched a new guest WiFi service called WiFiGuest.

The service is primarily for visitors and guests of the University and is a self-registration system based upon SKY/Cloud.

The service will be available across all University of Birmingham sites. These instructions were written for Mac OS X, but the process is almost identical for other operating systems.

If you are a current UoB Member of Staff or a Student please continue to use UOBwifi or Eduroam as your primary wireless connection.

Choose WifiGuest from the list of networks

Open up a new window or tab in a web browser, and you should be directed to the following page

Click on Go, and you will be asked to log in. If you have ever used The Cloud network before then it's the same log in.
